Fue I noticed: - If the wardrobe is very packed, it takes up to 24 hours until everything is properly down. (But you can avoid this by putting a new one every time you remove a drink and does not use the kitchen cupboard to be put on once.) - The temperature is firmly set to 4â ° C and cannot be changed if you can live with it, this is the right wardrobe for you. Morir Morir most customer opinions are positive. If I look at the price of this kitchen cupboard here, then I can only shout my head ... (I sometimes pay less for a large wiper!) , which has a 220 V connection in addition to a 12 V. I take it everywhere in the room where there is no cupboard. It is just as cold as a wardrobe, consumes little electricity. One would only have a little bit of the fellows of the Louvert. This kitchen bag cost me 45. Is a mini kitchen cupboard in the room?
