Expanded Edition

More than 125 of the original color studies, including the “flaps” and mobile parts have also been incorporated. Designed by New York City-based Potion Design, the Interaction of Color app is as close as most of us will arrive at the original version of Albers' masterpiece, which today lives mainly in special collections and museums. Image: Potion Design When Josef Albers published Color Interaction in 1963, it was nothing less than the entrance door to a whole way of thinking. This volume, with its sequence of lessons learned, perceptions reached and (before) powers dominated, is more than a milestone in design education: it is the geological outline of a man who is himself a milestone in design education. “The book that most influenced me is Color Interaction by Josef Albers. Color interaction was more a practical kit, with its collection of more than 150 printed silkscreen color studies, a corresponding commentary book and second book deepening into Albers' famous color philosophy, which were meant to be scurried on a table and interacted with as a way for students to learn about the relationships between colors. For anyone without a background of color theory, your mind will blow up. Fifty years later, the guts of the book still remain: the Albers theories developed during their time at the Bauhaus continue to be taught in art schools around the world. The mostOr at least the most enlightening, of the characteristics of the application are interactive studies, which simulate the cutting paper exercises that albers students used to learn theoretics as like Two seemingly different colors are exactly the same. “It was very important for me that you felt that there was a touch quality,” says Tiongson. That was a revelation for us, that this is how powerful these principles are—which work through all the media.”Compare the Color Interaction app for \$9.99 at Apple's app store. More than an opportunity to revisit the text, this application is for anyone who wants to learn more about thought creatively about color and its uses. The options you take here will apply to your interaction with this device. This modernized edition does not stop there. Nicholas Fox Weber is executive director of the Josef Foundation and Anni Albers. “It feels like, are you changing a color in me?” That was a revelation to us, that this is how powerful these principles are. “The Interaction of Color application comes with a palette of more than 250 swatches so users can create their own studies. Albers was elected to the National Institute of Arts and Letters in 1968 and was an emeritus professor of art in Yale until his death in 1976. An essential piece of visual literacy.”-Maria Popova, Brain Pickings “Joseph Albers, artist and best educator in the United States, is one of those who firstthe old hierarchical concept of color.”-Yusuke Nakahara, Color Planning Center No. 59 “The text of Color Interaction provides the careful reader with the of Josef Albers' famous color course. In 1950 he joined the faculty at Yale University as chairman of the department of design. First, there was its size: The original edition was massive (about as big as a turntable and as heavy as a 20-pound dumbbell) and it wasn't really a book. But the physical version of the book, which has been circulated primarily in paperback for the last four decades, needed an update. There is also archival video of Albers in the classroom. “It's as if you had seen the original studies the students had made with cut paper. Users can drag, lift and manipulate the plates and pieces to reveal the relationships between colors that are usually invisible to the untrained eye. Something very interesting happens between the factual, what we know is there, and how we actually see it,” says Michelle Komie, a senior editor at Yale University Press who has worked on previous print editions of Interaction of Color and oversaw the book-to-app process. “It feels like a trick, right?” says Tiongson of the plates' ability to alter your perception. The “flaps” and mobile parts have also been incorporated. Interviews with leading professionals such as the textile designer Christopher Farr, graphic designer Peter Mendelsund, painters Anoka Faruque and Brice Marden, product designer Brian Mullan (source for product development and supply in Fab), quilt and designer Denyse Schmidt, architect Anabelle Seldorf, and cultural historian Nicholas Fox Weber (Executive Director of The Josef and Anni Albers Foundation). More than 60 plates and interactive studies allow color experimentation. In 1933 he arrived in the United States, where he taught at Black Mountain College for sixteen years. Tiongson intended to put the colors available in the application so close to the cut paper colors used in the 1963 edition, but it was inevitable that there would be some variation in the dye and richness of the colors while changing from printing to digital. “The color is this objective in motion,” he says, explainingThe colors you see as pixels on your screen are very different from the colors you see in a construction paper book. For any colorless person of color, you will surprise you to drag a small salm - colored square with a more dark pink square just to realize that it is exactly the same color. With this book. Now, in association with the Josef Foundation and Anni Albers and developed by the award-winning signing and potion technology, Josef Albers “interaction of color yields”, as an interactive iPad application. They helped me learn about color. “Orla Kiely, Elle Decoration” I think this is possibly the most important book written about the color “-BroBin Foley, Image Interiors & Living” at the end of the book, you will better understand the best effects of intensity of color, temperature and more. And the amusement of illusions, remains an indispensable plan for the art of seeing. Yale University Press has just done that, by launching a new version for iPad of albers color texts and studies. There are many books on the color in the market, but nobody combines the view with a vision as deep as Josef Albers in the interaction of color. “ z worship everywhere “.
